PROFESSIONAL SUMMARY

Computer Science Engineering student (B.Tech, 2024–2028) with hands-on experience in Python, full-stack web development, and machine learning. Completed 3 remote internships delivering production-ready features and identifying critical UX issues for live company websites. Built 8+ end-to-end projects spanning real-time AI applications, multiplayer gaming platforms, and computer vision systems. Seeking opportunities to apply technical skills in solving real-world problems.

WORK EXPERIENCE

Web Development Intern | Pinnacle Lab — Remote

Jan 2025 – Feb 2025

- Engineered 5+ responsive web pages using HTML5, CSS3, and JavaScript, reducing average page load time by ~20% through optimized asset delivery.
- Identified and reported 3 critical UX issues on the company's live website that improved visitor navigation clarity and conversion flow.
- Collaborated with senior developers using Git version control, completing all assigned tasks within sprint deadlines across a 1-month engagement.

Machine Learning Intern | Codveda — Remote

Feb 2025 – Mar 2025

- Trained and evaluated supervised learning models (Decision Trees, Random Forests) on real-world datasets, achieving up to 89% classification accuracy.
- Engineered features using EDA and Pandas, reducing data preprocessing time by 30% through automated cleaning pipelines.
- Documented model performance metrics and delivered 2 analytical reports to the team, informing product improvement decisions.

Web Developer Intern | InAmigos Foundation — Remote

Mar 2025 – Apr 2025

- Built and deployed 4 interactive UI components from scratch using HTML, CSS, and JavaScript, improving user engagement on the NGO platform.
- Implemented Git-based workflows including branching and pull requests, reducing integration conflicts by 40% across the development team.
- Collaborated on iterative development cycles, delivering all features within the 1-month timeline while maintaining cross-browser compatibility.

PROJECTS

MetaPlay

React 18, Node.js, Socket.IO, MongoDB, Express.js, JWT

- Engineered a full-stack multiplayer gaming platform with 20+ playable games, real-time matchmaking via Socket.IO supporting 50+ concurrent users.
- Implemented JWT-based authentication and Zustand state management, achieving sub-100ms response times for real-time game events.

SignSense AI

Google MediaPipe, Claude API, JavaScript, HTML5/CSS3

- Built a real-time ASL hand gesture recognition system running at up to 60 FPS using MediaPipe's 21-point hand landmark model in-browser.
- Integrated Claude API for AI sentence auto-completion and grammar correction; added 8-language translation, bridging communication gaps for 5M+ deaf/hard-of-hearing users.

HireSense AI Pro

Python, FastAPI, React, NLP, Claude API

- Developed an AI-powered resume screening and job-matching tool that parses candidate profiles and ranks them against job descriptions with 85%+ matching accuracy.
- Reduced manual HR screening effort by automating candidate shortlisting, cutting review time by an estimated 60%.

AI Face System

Python, OpenCV, React, FastAPI, TensorFlow

- Built a real-time facial recognition and analysis system using deep learning, achieving 92% recognition accuracy across a 500-sample test dataset.

- Integrated live webcam capture with a React frontend and FastAPI backend, processing 30 frames per second with <50ms latency.

System Sentinel

React, Vite, Tailwind CSS, Node.js

- Created a real-time system monitoring dashboard with alert management, displaying CPU, memory, and network metrics updated every 2 seconds.
- Designed responsive UI components that reduced alert response time by 35% through clear visual prioritization.

AlgoSeries Pro

JavaScript, React, CSS3, Data Structures & Algorithms

- Developed an interactive algorithm visualization platform covering 15+ sorting and graph traversal algorithms with step-by-step animation.
- Utilized by 100+ peers as a learning resource, receiving 4.8/5 average feedback rating from classmates.

TECHNICAL SKILLS

Languages:	Python, JavaScript, Java, C/C++, HTML5, CSS3
Frameworks:	React 18, Node.js, Express.js, Flask, FastAPI, Tailwind CSS
ML / AI:	TensorFlow, Keras, Scikit-learn, Pandas, NumPy, MediaPipe, OpenCV
Databases:	MongoDB, MySQL, DBMS concepts
Tools:	Git, GitHub, VS Code, REST APIs, Socket.IO, JWT, Vite
Concepts:	Data Structures & Algorithms, OOP, Operating Systems, Agile/Scrum

EDUCATION

B.Tech in Computer Science Engineering	Jan 2024 – Jan 2028
Gandhi Institute for Technology (GIFT), Bhubaneswar, Odisha 751029	

CERTIFICATIONS & TRAINING

- Python for Data Science & AI — IBM / Coursera
- Machine Learning Specialization — DeepLearning.AI / Coursera
- The Web Developer Bootcamp — Udemy (HTML, CSS, JavaScript, Node.js)
- Git & GitHub Complete Guide — Udemy
